

What makes a Marine Water Heater “MARINE”?

At first glance, the Marine Water Heaters may not look all that different from a conventional home water heater. Read on to learn how specialized engineering, design, and materials, specifically tailored for onboard application, makes all the difference for hot water at sea!

Stainless Hardware: stainless steel screws and fasteners may seem like small details, but combine to add years of life at sea!

Jacket: 316 Brushed Stainless Steel jackets for maximum corrosion resistance. Jackets also available in high gloss white powder coat finish. Stainless fasteners standard on white jacket styles.

Anode Protection System: Yes, water heaters are *very* susceptible to galvanic corrosion! A maintainable anode system, properly sized, is critical for a water heater to survive onboard application.

Incoloy Sheathed Elements: Stainless Steel, Incoloy-Sheathed elements prevents shorting of the electrical circuit should element operate if not submerged! Available in 120V, 240V, 3 phase, and a vast range of wattages from 1500W to 18kw.

United States Coast Guard Ignition Protected thermostat system.

Inner Tanks: Tested to 300 P.S.I. , Torrid Marine’s inner tanks are constructed of high strength steel, *POWDER COATED* on the exterior to prevent rust, and *GLASS LINED* on the interior!

The Glass Lining is resistant to galvanic corrosion, and being an insulator, offers the same benefits of hot-liquid storage as a thermos or ceramic coffee cup! Glass lining yields a superior tank than aluminum, stainless steel, and copper. *5 Year Warranty included on Torrid Marine tanks.*

Heat Exchanger: take advantage of circulating engine coolant or your onboard hydronic heating system to heat water in addition to the electric system!

Secure mounting feet: secure and safe fastening ensures safety in heavy seas.

Yacht Spares

Every Torrid Marine™ Water Heater features **100% replaceable parts**. Global spares availability with parts inventory stocked worldwide and excellent technical support are only a few reasons discriminating boat owners and leading ship & yacht manufacturers choose Torrid Marine!

Sizes & Formats

Available in vertical, horizontal, and square formats, choose from a vast range of capacities and power configurations!
